NOTICE TO THE TRADE.

IN PRESENTING you with our 1893 Catalogue, we take pleasure in calling your attention to the fact that we manufacture the most complete line of Sash Locks of any manufacturer in the country, and fully satisfy the varied demands of the building public with our three forms of Sash Locks, viz :

The Champion Meetingrail Lock, (made in four sizes.)

The Champion Side Lock, (made in two sizes.)

The Champion Mortise Lock.

These Locks are made in all the popular finishes, and any special finish desired.

All our Sash Locks are manufactured under patents, and we caution all parties against making, using or selling Sash Locks which are an infringement on our patents.

Thanking our customers for their liberal patronage in the past, we are with best wishes.

Yours Truly,

THE CHAMPION SAFETY LOCK CO.

THE CHAMPION PATENT ADJUSTABLE AND REVERSIBLE SPOKE SHAVE.

Fig. 1.—Champion Adjustable and Reversible Spokeshave.

Fig. 2.—Back View of Champion Spokeshave.

This tool is a recent invention and is far superior to any other spoke shave in the market. Its blade can be easily adjusted so as to cut fine or coarse. It will cut on a flat surface, and can be quickly reversed so as to cut on a small curve, which is a decided advantage over all other spoke shaves. The workmanship is first-class.

The many mechanics who are already using them are unanimous in their verdict, that it is the best and most practical spoke shave they have ever used, and would not part with it for several times its cost if another could not be had.

The tool is guaranteed to be perfect in every respect

POINTS OF MERIT

OF THE

Champion & Meetingrail & Lock.

Three things are demanded in a modern Meetingrail Sashlock, viz.:

To pick up the sash from that point to which it usually rebounds, and raise it to its proper position.

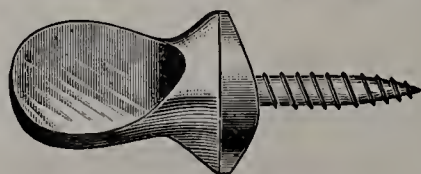

Perfect security against opening or picking from the out side, and to lock the sash so as to prevent them from rattling.

THE CHAMPION MEETINGRAIL LOCK meets this demand in every particular.

It has the merit of extreme simplicity combined with the greatest efficiency of any lock now known. It has remarkable strength, works easy and locks securely.

Architects, Builders and Hardware Dealers everywhere bear testimony to their unequalled merits. A thorough investigation will convince you of their superiority over all others.

Patented Champion Sash Lifter.

No. 64. Iron-Bronzed.....List Price, per dozen, \$ 40

No. 66. Real Bronze Plain..... " " 1 50

Packed, 3 Dozen in a Box.

These lifters are a great convenience for operating modern single light sashes. They overcome the difficulties met especially in adjusting the sashes where inside screens or sliding blinds are used. One or more lifters are placed at accessible points on both sides of the sash (by the side of the glass) and thus they are never in the way of anything, but always in easy reach to move the sash.

The shape of the under side of the base is made to conform to the Ogee or bevel of the sash. Their convenience is highly appreciated by all who use them.

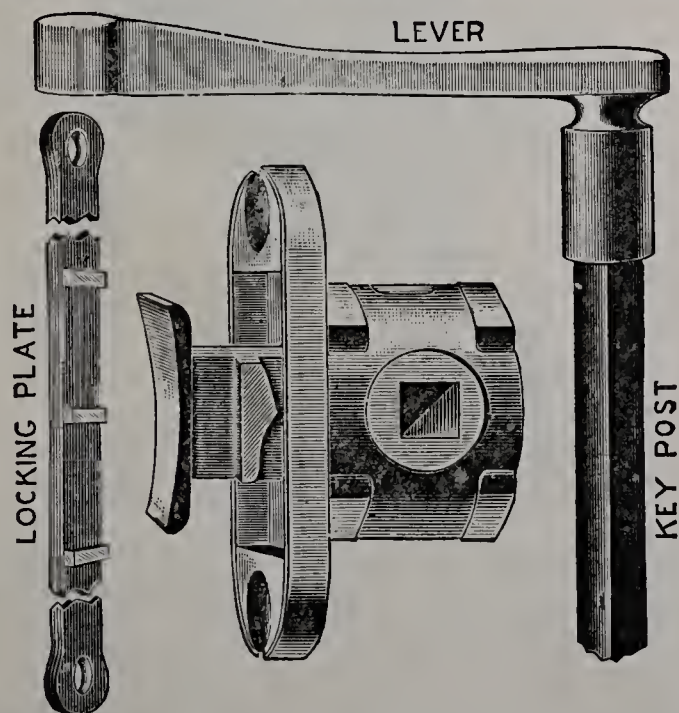

DESCRIPTIVE PRICE-LIST

POINTS OF MERIT

—OF—

CHAMPION MORTISE LOCKS.

PER DOZ.

No. 60. Malleable Iron Lock, Plain Real Bronze Metal Key.....\$8 00

These Locks do away with the annoyance of rattling windows, as the sash when locked is as firm as in a vice.

They are neat, being all out of sight, except the handle of the key.

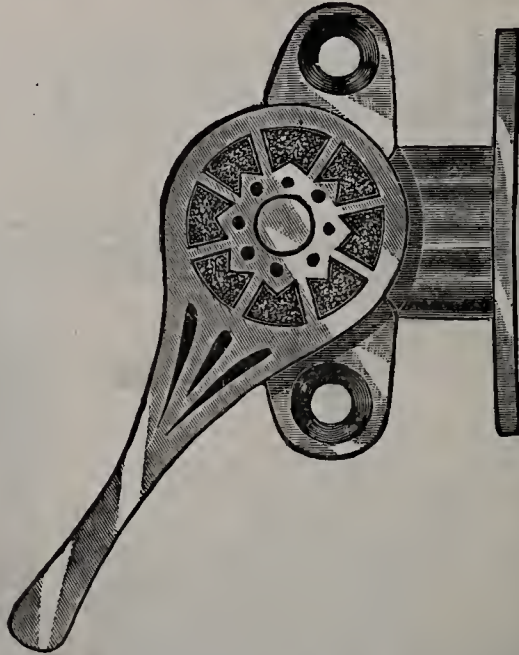

They are durable, made of malleable iron, no springs and can be mortised with a one inch bit.

One of the principal advantages gained by the use of them is that you can raise or lower your sash for ventilation and at the same time have it locked securely.

They do not damage the finish on a window.

They have been in extensive use for a number of years and are giving universal satisfaction.

POINTS OF MERIT
OF THE
CHAMPION SIDE SASH LOCKS.

Patented Aug. 7, 1883, Aug. 25, 1885, and Jan 26, 1886.

The Champion Side Sash Locks do away with the incessant rattling of the windows, as the sash, when locked, is as firm as in a vice.

They will lock the sash, upper or lower securely at any desired point, affording an excellent and safe means of ventilation.

By simple pressure against the sash, when locking, it acts as a weather-strip, and keeps out the dust and cold air.

They are neat in appearance, easily put on, cannot get out of order, and do not damage the finish of the window.

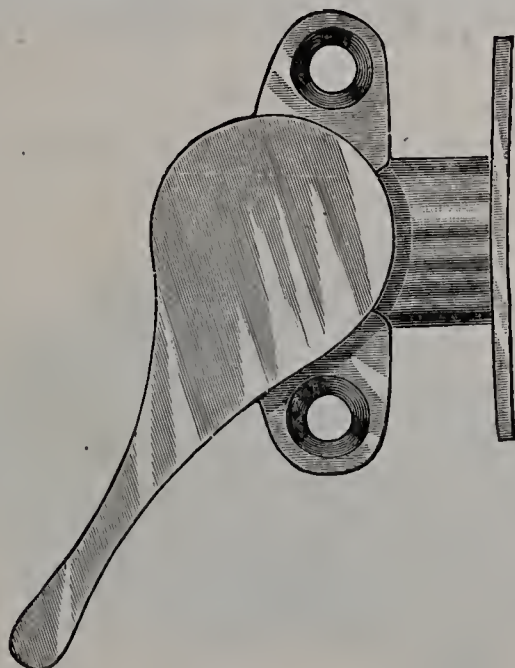

They are **CHEAP, SIMPLE, DURABLE**, made of malleable iron or bronze metal, have no springs to break or rubber to soften or wear out.

They are just the thing for window screens or sashes without weights.

These locks have been in extensive use for a number of years and have rapidly gained the public favor from the Atlantic to the Pacific Coast. Try them and you will buy them.

BEWARE OF WORTHLESS IMITATIONS.
